

# SPIGITENGAGE for MOBILE™

Reach across physical barriers to collaborate in real time from anywhere. Innovation is now on demand and right at your fingertips with Spigit's latest HTML mobile platform. SpigitEngage for Mobile is no longer an App but a native SaaS platform that provides broader support for today's mobile devices.

Collaborative Innovation does not happen in isolation, nor does it adhere to a schedule or respect physical boundaries. Because innovation is a collaborative process that knows no borders, the technology with which it is supported should be similarly flexible and portable. Spigit's latest HTML mobile platform, SpigitEngage for Mobile, puts innovation in the palm of your hand, allowing you to access innovation communities from anywhere in the world. Spigit's platform-agnostic mobile platform provides broader support for today's mobile devices, allowing users to capture their latest ideas anywhere, anytime, in real-time!

While the basic Spigit functionality invites users to post, vote, engage and explore, Spigit's most recent HTML platform is further designed to be completely intuitive, powerful and user friendly. Further, it underscores Spigit's key sources of differentiation by incorporating common threads devoted to collaboration, user engagement, and top-ranked users and content.

Technology has revolutionized how people work and collaborate today. Employees have the ability to work remotely, while contributing in the same way they would if present in the workplace. Spigit's latest mobile technology provides an improved user experience in the front end while connecting closely to the Spigit back-end to improve performance as well as SSO (single sign on) compatibility. The pervasive and stable mobile solution works faster and provides individuals with a more highly functional user interface. People can quickly navigate between multiple idea postings through the familiar interface of their mobile device and simple navigation menu with built-in access to all communities, categories, ideas, and comments. By moving away from a native application model, Spigit has made it easier for users to access their innovation communities from any modern mobile browser on the fly anytime, anywhere.

## WITH SPIGITENGAGE FOR MOBILE, USERS CAN:

- **Quickly navigate** between multiple Idea postings using a number of modern mobile devices via an HTML browser.
- **Utilize a simple navigation menu** with built-in access to all communities, categories, ideas, and comments.
- **View, post, comment, vote, and share ideas** on the fly.

## ABOUT SPIGIT

*Spigit, the crowd innovation company, creates a new paradigm for realizing untapped business value - connecting employees, customers and business partners for innovation and insight discovery. Using social crowd technology, Spigit's solutions elicit insight and business intelligence from an organization and transform it into actionable, predictive information. By incorporating game mechanics, social recognition and rewards, idea graduation, and automated workflow, Spigit activates crowds and allows companies to harness the social capital within their internal or external communities.*

*Spigit's technology is used by the largest and most innovative companies in the world including, Overstock.com, AAA, US Bank, City of New York, Estee Lauder and Capgemini. For more information, visit [www.spigit.com](http://www.spigit.com), email [info@spigit.com](mailto:info@spigit.com) or call 1-855-SPIGIT1.*
